

MUHAMMAD ZEESHAN

(+92) 3353730974 | dev.mzeeshan@gmail.com | Portfolio | Github | LinkedIn

PROFESSIONAL SUMMARY

AI Engineer & Technical Team Lead with 2+ years of experience architecting production-grade Generative AI systems, advanced RAG pipelines, and automated MLOps workflows. Proven track record of leading cross-functional teams to deliver scalable SaaS solutions and business intelligence platforms. Specialized in optimizing LLM orchestration to drive measurable corporate automation.

TECHNICAL SKILLS

AI & Machine Learning: Generative AI, RAG, NLP, Computer Vision (YOLOv5, OpenCV), PyTorch, Embeddings

Programming: Python (Django, FastAPI, Flask), SQL (PostgreSQL, MySQL), JavaScript, HTML/CSS

Cloud & MLOps: Docker, AWS (EC2, S3), Hugging Face, GitHub Actions, Render, Vercel

Tools: LangChain, n8n Automation, FAISS, Pinecone, Groq API, OpenAI API, Power BI

Concepts: Vector Search, Prompt Engineering, LLMOps, System Design, ETL Processes

PROFESSIONAL EXPERIENCE

Freelance AI & Full-Stack Developer

Remote / Self-Employed

Feb 2023 – Present

Islamabad, Pakistan

- Architected and deployed production AI solutions, including an **AI Meeting Assistant** for automated transcript analysis.
- Engineered scalable automation brokers using **n8n on Hugging Face**, reducing manual data entry by **60%** for client workflows.
- Designed custom Python ETL and string manipulation pipelines tailored for real-time e-commerce sentiment analysis.
- Built full-stack web applications featuring integrated Computer Vision models to boost educational engagement.

Amalaxis

AI Engineer / Python Developer (Team Lead)

Dec 2024 – Nov 2025

Islamabad, Pakistan

- Led backend engineering for **PULSE.AI**, integrating custom ML models for Sales and Churn Prediction with **90%+** accuracy.
- Spearheaded enterprise RAG systems using LangChain and FAISS, enabling secure semantic search across massive datasets.
- Optimized Django REST APIs for high-throughput data ingestion, accelerating system response times by **40%**.
- Collaborated with data science teams to transition research models into production-ready microservices.

Global Link Pvt. Ltd.

Associate Software Developer

Nov 2023 – May 2024

Islamabad, Pakistan

- Engineered an IoT safety monitoring system featuring **Real-time Drowsiness Detection** via OpenCV and ESP32 hardware.
- Automated live video stream processing pipelines, minimizing critical latency in safety-alert systems.

FEATURED AI PROJECTS

Enterprise RAG QA System | *LangChain, FAISS, OpenAI, Python*

- Developed a document intelligence system with **contextual re-ranking** and semantic chunking for **100%** precise retrieval.
- Integrated an interactive Streamlit UI, enabling zero-shot unstructured queries across multi-format files (PDFs, CSVs).

Eduviz - Interactive AI Avatar Engine | *OpenCV, Computer Vision, FastAPI*

- Built a multimedia platform transforming static images into **speaking AI avatars** using real-time lip-sync pipelines.
- Implemented gesture-controlled navigation mechanics to enhance user UX through innovative computer vision models.

AgenticFlow - Multi-Tenant AI Workflow Automation SaaS | *Django, CrewAI, PostgreSQL, Redis*

- Engineered a scalable multi-tenant SaaS platform empowering enterprises to deploy autonomous AI agents for market research.
- Built a robust task-orchestration engine using **CrewAI** for asynchronous execution, handling **1,000+** concurrent requests.
- Integrated usage-based API metering via Stripe, optimizing LLM operational costs while ensuring absolute tenant data isolation.

IoT Safety - AI Drowsiness Guardian | *OpenCV, ESP32, Python, IoT*

- Deployed an integrated hardware-software framework for industrial safety, hitting a **92%+** accuracy rate in dim lighting.

EDUCATION

COMSATS University Islamabad

Feb 2020 – Jan 2024

Bachelor of Science in Computer Science (CGPA: 3.43 / 4.0)

- Achievements: Secured 1st Position in Batch (Semesters 1 & 6); ExciteCup23 Speed Programming Participant.

ACHIEVEMENTS & SKILLS SUMMARY

- **Honors:** 1st Position in Batch (CUI), National Engineering Robotics Competition Participant.
- **Tools:** Docker, AWS (EC2/S3), Power BI, MySQL, Git, n8n, LangChain.
