PROFESSIONAL SUMMARY

Software & AI Engineer with 2+ years of hands-on experience developing production-grade GenAI systems, scalable web backends, and cloud automation workflows. Proficient in Python (Django DRF, FastAPI), AI integration (LangChain, FAISS, RAG), Docker containerization, and REST API testing. Proven track record of optimizing system performance by 40%, maintaining cloud infrastructure, and shipping end-to-end applications from scratch.

TECHNICAL SKILLS

AI & Machine Learning	RAG Pipelines, LangChain, FAISS Vector Search, PyTorch, OpenCV, HuggingFace
Backend & Web	Python, Django DRF, FastAPI, Flask, React, REST APIs, PostgreSQL, MySQL, Redis
Cloud & DevOps	Docker, AWS (EC2/S3), GitHub Actions (CI/CD), Linux/Bash, Vercel, Render
Testing & Automation	API Verification, Postman, Integration Validation, n8n, Meta Cloud API, Webhooks
Core Concepts	System Architecture, Latency Optimization, Database Design, LLMOps

PROFESSIONAL EXPERIENCE

Amalaxis	Dec 2024 – Present
Software & AI Engineer	Islamabad, Pakistan
- Led backend engineering for PULSE.AI, an enterprise BI platform; built scalable Django REST APIs and integrated production ML revenue prediction models. - Containerized microservices using Docker and deployed cloud infrastructure on AWS (EC2/S3) with GitHub Actions CI/CD. - Engineered production-grade RAG pipelines (LangChain, FAISS) for semantic search across large document datasets. - Designed and tested 3 production WhatsApp AI bots using n8n, Meta Cloud API, and LLM integrations, handling end-to-end integration testing. - Built responsive client analytics dashboards (React + Django DRF) for real-time conversation and order tracking. - Optimized database queries and API payloads, reducing average server response latency by 40%.	
Global Link Pvt. Ltd.	Nov 2023 – May 2024
Associate Software Developer	Islamabad, Pakistan
- Engineered an IoT safety monitoring system featuring real-time Drowsiness Detection via OpenCV and ESP32 hardware. - Streamlined video processing pipelines and tested edge-to-cloud data stream reliability under low-latency constraints.	
Bitcode Systems	Aug 2023 – Oct 2023
Web Developer	Islamabad, Pakistan
Developed full-stack Python/Django web applications, designed relational database schemas, and handled production deployment.	

FEATURED PROJECTS

WhatsApp AI Automated Ordering Platform	n8n, Meta Cloud API, GPT-4/Llama 3, Airtable, Webhooks
Deployed an automated WhatsApp order system handling 50+ daily transactions with 99.9% integration reliability and real-time CRM logging.	

DocSense - Hybrid RAG Document Intelligence *Python, LangChain, FAISS, OpenAI, Streamlit* Live Demo | [GitHub](#)

- Implemented a hybrid retrieval system combining BM25 keyword search with FAISS vector search for superior accuracy over standard RAG models.

AI Meeting Assistant *Whisper, Groq API, Llama 3, Docker, Gradio* Live Demo

- Built and containerized a Whisper-based transcription and summarization app deployed on HuggingFace Spaces.

EDUCATION

COMSATS University Islamabad Feb 2020 – Jan 2024

Bachelor of Science in Computer Science | CGPA: **3.43 / 4.0**

- 1st Position in Batch (Semesters 1 & 6); ExciteCup23 Speed Programming; National Robotics Competition.

CERTIFICATIONS

- Python Data Structures & Algorithms (2026)
- Data Science, Machine Learning & Blockchain (2024–2025)
- Neural Networks & Deep Learning — Coursera (2023)
