PROFESSIONAL SUMMARY

AI Engineer with 2+ years of hands-on experience building production-grade GenAI systems, RAG pipelines, and WhatsApp automation for real businesses. Specialized in integrating Large Language Models with scalable Django backends and shipping ML models to production. Co-founder of **ChatSetGo**, an AI automation agency that has delivered 3 custom WhatsApp AI bots and n8n automation workflows for Pakistani businesses.

TECHNICAL SKILLS

AI & GenAI	RAG, LangChain, FAISS, GPT-4, Llama 3, Groq API, OpenAI API, Prompt Engineering, Embeddings, Vector Search
ML & Vision	PyTorch, OpenCV, YOLOv5, NLP, XGBoost, Scikit-learn, HuggingFace Transformers
Backend	Python, Django, DRF, FastAPI, Flask, REST APIs, PostgreSQL, MySQL, Redis
Automation	n8n, WhatsApp Business API, Meta Cloud API, Evolution API, Airtable, Google Sheets
DevOps	Docker, AWS (EC2/S3), GitHub Actions, Vercel, Render, HuggingFace Spaces
Concepts	LLMOps, System Design, ETL Pipelines, Semantic Search, Vector Databases, Power BI

PROFESSIONAL EXPERIENCE

ChatSetGo	Jul 2025 – Present
<i>Co-Founder & AI Automation Engineer</i>	<i>Islamabad, Pakistan</i>
- Co-founded an AI automation agency (chatsetgo.tech) delivering WhatsApp bots and workflow automation to Pakistani SMBs (restaurants, salons, clinics). - Designed and deployed 3 production WhatsApp AI bots using n8n, Meta Cloud API, and GPT-4 / Llama 3 LLM integration. - Built a custom client analytics dashboard (React + Django REST API) for real-time WhatsApp conversation and order monitoring. - Architected end-to-end automation workflows connecting WhatsApp, Google Sheets, Airtable, and CRM systems, eliminating manual data entry for clients. - Managed full project lifecycle: client discovery, solution architecture, deployment, and post-launch support.	
Amalaxis	Dec 2024 – Jul 2025
<i>AI Engineer / Python Developer</i>	<i>Islamabad, Pakistan</i>
- Led backend development for PULSE.AI, an AI-powered business intelligence platform serving restaurant chains. - Deployed Sales Revenue Prediction and Churn Prediction ML models in production, integrated via scalable Django REST APIs. - Built enterprise RAG pipelines using LangChain and FAISS, enabling semantic search across large business document datasets. - Optimized Django REST APIs for high-throughput data ingestion, reducing average response latency by 40%. - Collaborated with the data science team to transition research models into production-ready microservices.	
Global Link Pvt. Ltd.	Nov 2023 – May 2024
<i>Associate Software Developer</i>	<i>Islamabad, Pakistan</i>

- Engineered an IoT safety monitoring system with real-time Drowsiness Detection via OpenCV and ESP32 hardware.
- Automated live video stream processing pipelines, reducing critical latency in safety-alert systems.
- Developed and maintained AI-driven enterprise applications; optimized code for real-time analytics.

Bitcode Systems

Aug 2023 – Oct 2023

Web Developer

Islamabad, Pakistan

- Developed Python/Django web applications; designed complete database models and ERDs.
- Managed projects from initial requirements through final production deployment.

FEATURED PROJECTS

WhatsApp AI Ordering Bot *n8n, Meta Cloud API, GPT-4/Llama 3, Airtable* chatsetgo.tech

- Deployed a fully automated WhatsApp ordering system for a local Islamabad restaurant, handling 50+ orders/day end-to-end with zero human involvement.
- Customers browse the menu, place orders, and receive real-time confirmation entirely within WhatsApp.
- Built on Official WhatsApp Business API with automated CRM logging and a live client analytics dashboard.

PULSE.AI Restaurant BI Platform *Django, LangChain, ML Models, REST API* Private

- Led production backend of a BI platform for restaurant chains with AI-driven Sales, Churn Prediction, and Customer Behavior models.
- Designed scalable Django REST APIs for real-time ML inference and dashboard data delivery.

IoT Drowsiness Detection System *OpenCV, ESP32, Python, IoT* Global Link

- Built a hardware-software industrial safety system achieving 92%+ detection accuracy in low-light conditions.
- Integrated real-time ESP32 hardware alerts and automated video stream processing pipeline.

RAG Document QA System *LangChain, FAISS, OpenAI, Streamlit* Live Demo | GitHub

- Document intelligence system with semantic chunking and contextual re-ranking for natural language queries across PDFs and CSVs; publicly deployed.

AI Meeting Assistant *Whisper, Groq API, Llama 3, Gradio* Live Demo | GitHub

- Converts meeting recordings into structured summaries, action items, and downloadable PDF reports using Whisper + Groq.

EDUCATION

COMSATS University Islamabad Feb 2020 – Jan 2024

Bachelor of Science in Computer Science | CGPA: 3.43 / 4.0

- 1st Position in Batch (Semesters 1 & 6); ExciteCup23 Speed Programming Participant; National Engineering Robotics Competition Participant.

CERTIFICATIONS

- Python Data Structures & Algorithms (2026)
 - Data Science, Machine Learning & Blockchain (2024–2025)
 - Neural Networks & Deep Learning Coursera (2023)
- Verify
